Skills

Programming & Tools: Python, Typescript, SQL, React, Django, Pandas, Git

Cloud & Data Platforms: AWS, GCP, Azure, Azure Data Factory, Databricks, Power BI

Knowledge Domains: Machine Learning, NLP, Data Analytics, Data Architecture, Project Management, LLMs

Professional Experience

W. L. Gore & Associates

Data Scientist | April 2024 – Present

- Engineered scalable data pipelines and transformation workflows using **Azure Data Factory** and **Databricks (PySpark)**
 - Ingested data via Azure Data Factory from internal databases, SAP, Adobe Analytics, and Salesforce.
 - Utilized medallion architecture strategy to create fact and dimension tables.
 - Developed **Power BI dashboards** for manufacturing operations, enabling critical KPIs.
- Digitized and parsed legacy PDF documents using automated extraction workflows, significantly improving accessibility of historical data related to cable documentation.
 - Processed over two thousand documents across multiple product lines.
 - Extracted insights to table format and summarized fields using a local-LLM.
- Applied machine learning techniques to analyze large-scale datasets from the FDA, generating insights into product performance for the medical division.
 - Created a tool to parse datasets for keywords related to products and points-of-failure.
 - Integrated a Power-BI template that could be reused to display this data for multiple uses.

Software Engineer | July 2022 – April 2024

- Developed a **zero-trust analytics platform** in partnership with The Mayo Clinic to support stem cell therapy research.
 - Full-stack contributor using **React**, **Flask**, and **GCP/AWS** technologies.
 - End product is in use by Mayo Clinic scientists which they use to this day for data-quality and handling multi-terabyte file uploads.
 - Built an **AI-powered solution** to mine insights from customer reviews of our apparel lines using traditional NLP methods and the **ChatGPT API**.
 - Ingested and cleaned thousands of reviews via Python and a Salesforce endpoint.
 - Processed thousands of reviews leading to multiple changes in the garment production pipeline.
 - Led a computer vision initiative. Guided and maintained the project until it was sunset. Further details subject to an NDA with a third-party.
-

Education

Georgia Institute of Technology

Master of Science in Computer Science | Expected December 2026

University of Delaware

Bachelor of Science in Computer Science | May 2022
